Summary — Angular Developer with 2 years of experience in creating responsive and user-friendly web applications. Skilled in Angular, TypeScript, and front-end development.

Skills

Languages JavaScript,TypeScript,NodeJS,HTML,CSS   **Framework** Angular, Material, Bootstrap, Talwind,

Experience

VIS NETWORKS   **Jul 2022 – Current**
Angular Developer

Project 3: Multi interaction application

– Worked on a Project that supports a multi-interaction functionality i.e. Chat, Call, Video interaction and Mail. Handled the End-user interaction with a lesser bug count.
– Implemented features like reactive form control, services, modules, Rxjs and many third-party libraries.
– Handled errors and bugs while interacting with API calls under a strict bandwidth.
– Collaborated with cross-functional teams to streamline IT processes and improve efficiency
– Handled CI/CD as per sprint planning.

Project 2: Calling application

– Worked as an Angular developer for creating an end-user application according to clients.
– Fetching data by API calls and showing the data to the user was the key responsibility.
– Handled bug fixing and releases with strict deadlines

Zebaq Web Pvt.ltd   **March 2022 – May 2022**
Frontend Developer (Intern)

– Developed more than 3 e-commerce websites using HTML,CSS and javascript
– Used WordPress and plugins to create dynamic websites
– Participated in team meetings and code reviews, gaining valuable feedback and enhancing coding skills.
– Configured and customized plugins to extend website functionality, ensuring seamless integration and performance like WooCommerce, Contact Form 7 and more.
– Identified and resolved plugin conflicts and bugs by analyzing error logs and user reports, ensuring smooth site operation.

Education

Trident Academy of Technology
Masters in Computer Applications

Certifications

– Artificial Intelligence - NPTEL
– MIT - NPTEL
– IOT - NPTEL

Projects

ConvoBuddy. / Gemini Chatbot

– I created a chatbot project from scratch that's both responsive and multilingual. Using Angular
– Built an intuitive interface and integrated advanced AI powered by the Gemini model for natural language processing.
– This allows users to interact effortlessly in multiple languages, improving accessibility and overall user experience.
– Overall, the project demonstrates my commitment to leveraging cutting-edge technology to create user-centric solutions.

Gehna

– I led the creation of an e-commerce platform for a neighbourhood jewellery store. Using Angular for the website's look and feel and Express.js, MongoDB, and Node.js for the technical backbone, I built a smooth shopping experience. Customers could easily browse, authenticate, and securely pay for their purchases, whether on a computer or smartphone.
